PROFESSIONAL SUMMARY

Senior Java Full Stack Developer with 5+ years of experience designing, building and running secure enterprise applications with Java, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA and PostgreSQL. Senior Project Engineer and technical lead at the Centre for Development of Advanced Computing (C-DAC), Noida, currently leading the state onboarding of SUGAM Labs, the laboratory process automation system for CDSCO and state drug testing labs, and managing a development team through task allocation, code reviews, user training and stakeholder coordination. Experienced in backend architecture, REST API design and external system integration, application security aligned with CERT-In security guidelines and the OWASP Top 10, PostgreSQL design and tuning, requirement analysis and technical documentation.

TECHNICAL SKILLS

Core Java and Spring: Java, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Struts 2, JDBC

APIs and Integration: RESTful APIs, API authentication (token-based), JSON, XML, external system integration, scheduled data synchronisation, request/response logging

Databases: PostgreSQL, MySQL, SQL, PL/SQL, PL/pgSQL; schema design, stored procedures, triggers, query optimisation

Application Security: Spring Security (authentication and authorisation), role-based access control (RBAC), OWASP Top 10 (SQL Injection, XSS, CSRF), session management, audit logging, secure deployment aligned with CERT-In security guidelines

Reporting and Documents: JasperReports, BIRT, iText, ZXing (QR/barcode), Aadhaar eSign

Frontend: JSP, JavaScript, jQuery, DataTables, Select2, HTML, CSS

DevOps and Tools: Git, GitHub, GitLab, Maven, Jenkins, Docker, Apache Tomcat, Linux, Eclipse, Spring Tool Suite (STS), PuTTY, WinSCP

Leadership and Delivery: Team leadership, task allocation and progress tracking, code and design reviews, mentoring, stakeholder management, requirement analysis, UAT coordination, user training, production rollout, Agile/Scrum, technical documentation

PROFESSIONAL EXPERIENCE

Senior Project Engineer (Java Full Stack Developer / Technical Lead)

April 2025 – Present

Centre for Development of Advanced Computing (C-DAC), Noida

SUGAM Labs Portal | Laboratory process automation system for CDSCO and state drug testing labs

- Lead the state onboarding and rollout of the SUGAM Labs Portal, coordinating portal configuration, UAT, issue resolution and production deployment with participating State Laboratories and State FDA stakeholders.
- Lead and coordinate the development team for assigned SUGAM Labs modules, including task allocation, progress tracking, technical guidance, mentoring and delivery coordination.
- Conduct technical and code reviews covering Java, Spring MVC, Spring Boot, Spring Security, Hibernate/JPA, PostgreSQL and REST APIs, with a focus on security, performance and correctness.
- Coordinate with State FDA officials, laboratory users and other stakeholders to gather requirements, resolve functional issues and drive portal adoption.
- Plan and conduct user training and knowledge-transfer sessions for State administrators, laboratory administrators and portal users.
- Led the Port Office integration for customs and import/export samples, designing secure data exchange between Headquarters, Zonal and Port Offices.
- Built REST integrations with external government systems using token-based API authentication, JSON/XML payloads, scheduled synchronisation and response logging.
- Implemented and reviewed Spring Security authentication and role-based authorisation, and OWASP Top 10 remediation (SQL Injection, XSS, CSRF) aligned with CERT-In security guidelines.
- Optimised application and PostgreSQL query performance, and led production troubleshooting, defect analysis and deployment activities.
- Built decision-making dashboards for senior regulatory authorities; co-authored the SUGAM Labs v2.0 user manual (June 2026) and architecture documentation.

Project Engineer (Java Full Stack Developer)

October 2021 – April 2025

Centre for Development of Advanced Computing (C-DAC), Noida

SUGAM Labs Portal | *Spring MVC, Spring Security, Hibernate, PostgreSQL, JSP*

- Built the Lab Module covering sample registration, testing records, results and report release.
- Implemented the Drug Inspector Enforcement and Court Proceeding modules for end-to-end tracking of statutory forms and legal cases.
- Designed tamper-evident audit logging that records every system change for data integrity and regulatory compliance.

Human Resource and Finance Management System (HFMS) | *Java, Struts 2, PostgreSQL*

- Designed and built employee registration, leave, APAR (Annual Performance Appraisal Report) and salary generation modules.
- Optimised the leave and APAR services, improving stability, reducing defects and delivering the 30% performance gain.
- Resolved production issues through debugging and log analysis, and delivered end-user documentation and training.

iVEDA Portal | *Java, Spring Boot, XML, PostgreSQL*

- Built Spring Boot modules for authenticating drug packages exported from India, including XML upload of product and package data from web and desktop clients.
- Designed database schemas, stored procedures and triggers, and optimised complex queries for high-volume data.
- Remediated OWASP Top 10 vulnerabilities (SQL Injection, XSS, CSRF) and implemented protections in Spring Boot.

ICDRA Portal | *19th International Conference of Drug Regulatory Authorities*

- Developed the online registration module for international delegates attending the five-day conference, keeping it reliable through high-traffic periods.

Across projects: database backup and restore, root-cause analysis from logs, requirement gathering with cross-functional teams and on-time delivery.

KEY ACHIEVEMENTS

- Delivered modules for 4 government platforms at C-DAC, including SUGAM Labs, used by CDSCO and state drug regulators across India.
- Achieved a 30% performance improvement in HFMS through backend service optimisation.

EDUCATION

M.Tech, Computer Science | Indian Institute of Information Technology (IIIT), Guwahati

B.Tech, Electrical and Electronics Engineering | GITAM University, Visakhapatnam
